

Community Engagement Policy

Navarre Minerals Limited

The directors and senior management of Navarre Minerals Ltd (“the Company”) recognise the importance of community engagement as an integral part of our exploration activities. We set out to develop strong relationships with our neighbours by encouraging community confidence and mutual respect.

Mutual respect depends on our understanding the issues that are important to our neighbours and our neighbours understanding what is important to us. Wherever we operate, we do our best to accommodate the different lifestyles, heritage and preferences of our neighbours. Our communities and environment work is closely coordinated and takes account of peoples’ perceptions of the effects and consequences of our activities.

This Community Engagement Policy underpins the Company’s commitment to deliver benefits to the communities in which we operate, and also encompasses our statutory obligations.

Our Community Engagement Policy recognises that the stakeholders with whom we engage have rights and deserve respect, and this guides the way that we collaborate with the communities and stakeholders with whom we work. The objectives of the Company’s commitment to community engagement are to:

- be proactive and transparent in our engagement with communities;
- build community engagement and capacity by developing and implementing activities that will support social infrastructure, provide opportunities for employment and training, and will create long term and sustainable benefits;
- contribute to the regional economy through developing and supporting regional infrastructure and businesses;
- contribute to local environmental sustainability and improvement; and
- contribute to developing community programs through appropriate participation and support.

We aim to achieve these community engagement practices by having an appropriately structured Community Engagement Plan. The development of this Plan is a dynamic system that underpins our commitment to community interaction by all employees and contractors.
