Navarre hits first high grades at Irvine

DECEMBER 1, 2016 3:19PM

Newsbites Finance

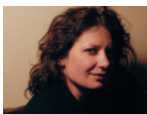

Navarre Minerals has confirmed Stawell-style gold mineralisation at the Irvine prospect from its maiden 4,000m air-core drilling program at its Stawell Corridor gold project.

Drill hole IAC018 intersected 2m at 41.5g/t gold from surface and 6m at 6.3g/t gold from 66m down hole including 1m at 24.6g/t gold.

Drill hole IAC017 intersected 8m at 1.2g/t gold from 18m down hole from within a broader zone of 20m at 0.9g/t gold, also from 18m.

The results represent a new mineralised zone unrecognised by previous explorers and provide early confidence for further potential gold discoveries as the drilling program progresses along the basalt margins.
